

ROȘIA MONTANĂ: TURNING THE RED MOUNTAIN GREEN

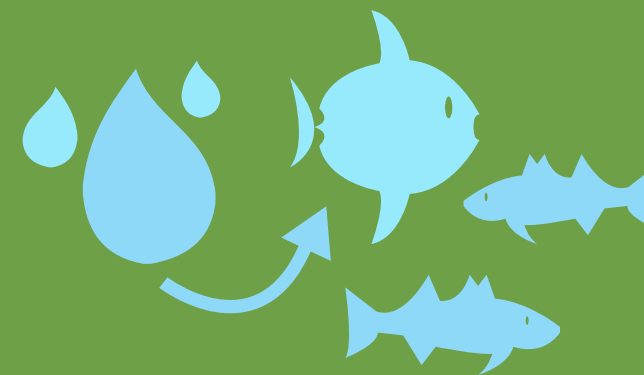

OVER
100
LITRES
A SECOND

Every second 100 litres
of highly acidic water flows
into Roșia's streams

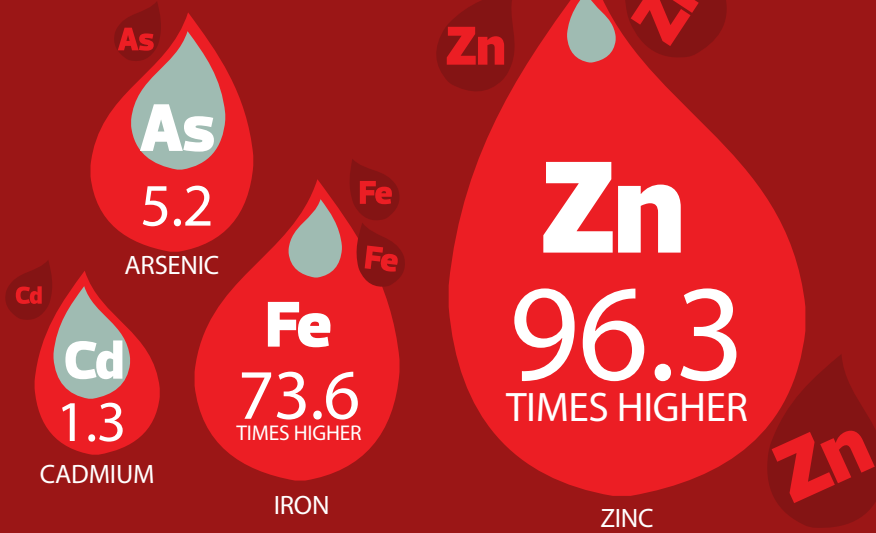

Biodiversity will return to the area,
including birds, small mammals,
reptiles, and plants

Clean waters will
revive aquatic life

Revival of the environment will attract tourism
and help build the agricultural industry.

The current toxicity levels in Roșia's streams are much higher than the maximum concentration allowed

Existing concentration Maximum allowable concentration
