

# ROȘIA MONTANĂ BOOSTING EMPLOYMENT ACROSS ROMANIA

Before **1990**, over **1 million people** were working in the **mining sector**  
175,000 miners, 350,000 direct employees  
700,000 indirect employees

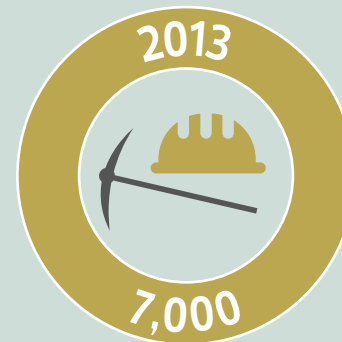

There were still **8,000 people** in mining in **2006**

That number dropped to **2,500** in **2012**

By restarting **one single mine** in Roșia Montană the number of Romanians employed in metal mining would **double** compared to the level in **July 2012**. Overall, the mine will create more than **7,000** direct & indirect jobs

The **reigniting of the mining industry** in Romania and the opening of additional mines could generate **thousands of jobs**, with a correspondingly large impact on the national economy.
